Education

University of Michigan

Ph.D. in Electrical and Computer Engineering

Computer Vision and Machine Learning. GPA:4/4

2021-present

Ann Arbor, USA

University of Michigan

M.Sc. in Electrical and Computer Engineering

Signal and Image Processing and Machine Learning. GPA:4/4

2019-2021

Ann Arbor, USA

Sharif University of Technology

B.Sc. in Electrical Engineering

Communication Systems. GPA: 17/20 (3.70/4)

2014-2019

Tehran, Iran

Research Interest

Efficient Deep Learning Networks, Low-Cost Computer Vision Models, Multi-Task Learning, Multi-Modality, Real-time Video Processing

Professional Experience

University of Michigan

Graduate Student Research Assistant | Advisor: Prof. Hun-Seok Kim

2020 – present

Ann Arbor, MI

Efficient multi-modality sensor fusion for 3D object detection

- Conducting research on adaptive LiDAR for 3D object detection.

Efficient Computation Sharing for Multi-Task Visual Scene Understanding

- Introduced a novel framework that efficiently addresses multiple visual tasks by sharing knowledge through computation and parameter sharing among individually trained single-task transformers, outperforming SOTA in accuracy and resource utilization across image and video data.

Siamese Learning-based Monarch Butterfly Localization

- Advocated a GPS-less strategy utilizing deep learning sensor fusion to enhance daily Monarch butterfly tracking accuracy. The model incorporates daylight intensity and temperature data, enabling accurate butterfly localization through the utilization of Siamese networks.

University of Michigan

Graduate Student Research Assistant | Advisor: Prof. Necmiye Ozay

2019 – 2020

Ann Arbor, MI

Falsification of a Vision-based Automatic Landing System

- Performed an exhaustive analysis of automatic landing system reliability for fixed-wing aircraft, utilizing camera-centric sensing. Devised an innovative vision-oriented landing framework, integrating PID control and runway location estimation.

Commonwealth Scientific and Industrial Research Organisation

Research Intern

Fall 2018

Brisbane, Australia

Estimating heart rate and detecting feeding events of fish using an implantable biollogger

- Devised an advanced processing pipeline for resource-constrained embedded systems, extracting key insights like heart rate and feeding events.

Sharif University of Technology

Student Research Assistant

2017 – 2018

Tehran, Iran

- Developed a novel model for the accurate detection of Apnea disease utilizing ECG signals.

Course Projects

3D Shape Synthesis via Style and Deep Geometric Texture Transfer | [\[Code\]](#) | *EECS 542*

Fall 2021

COVID-19 X-Ray Image Classification Using Contrastive Learning | [\[Code\]](#) | *EECS 545*

Winter 2021

Invariant set computation for auto-landing systems using HJB toolbox | *EECS 563*

Fall 2020

MPC controller for dynamic vehicle collision avoidance and path-following | [\[Code\]](#) | *EECS 561*

Winter 2020

Unpaired Image-to-Image Translation using CycleGaN | [\[Code\]](#) | *EECS 504*

Fall 2019

Technical Skills

Languages: Python, MATLAB, Julia, C.

Machine Learning Libraries: Pytorch, Tensorflow, Scikit-Learn, Pandas.

Relevant courses: (1) Probability and Random Processes, (2) Matrix Methods for Signal Processing and Machine Learning, (3) Optimization Methods in Signal Processing and Machine Learning, (4) Computer Vision, (5) Advanced Computer Vision, (6) Hybrid Control.

Scholarships & Awards

- Audience choice awards for the paper presentation at DSLW 2022. | *May 2022*.
- Full fund PhD offers from UMICH, Purdue University, WISC. | *Fall 2021*.
- Full fund PhD offers from WISC, Rice University, UCSB, NCSU, ND. | *Fall 2019*.
- Ranked 85th (top 0.038 percent) among 222'507 participants in the Iranian Nationwide University Entrance Exam Known as Konkoor. | *Fall 2014*.
